

Special Issue

Advanced Flexible Sensors and Electronics

Message from the Guest Editor

This Special Issue focuses on new developments of technology in flexible sensor and electronics, such as display components by means of new materials, new device structure, and operation system techniques. The sensor would specially focus on gas, chemical, bio-signal, biomaterial, and biometric images. Furthermore, papers introducing new characterization and real-time monitoring methods in a variety of fields will enrich this Special Issue. We would like to invite original research articles as well as review articles that contain theoretical, analytical, and experimental investigations covering all aspects of advanced flexible sensors and electronics.

Guest Editor

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
