Fluorescent Biosensors 2019

Message from the Guest Editor

“An ounce of prevention is worth a pound of cure” said Benjamin Franklin. Detection of disease pathogens in the environment and in secondary hosts before they infect the human population will usher in a new era of preventative disease control and the promise of lower health care costs. Fluorescent biosensors are reagents, proteins, complexes, cells, and devices that transduce a biological analyte to a light signal. In this Special Issue, we explore the efforts of biological and biochemical engineering towards realizing Ben Franklin’s vision on the public health stage.

Guest Editor

Prof. Dr. Christopher Bystroff

Rensselaer Polytechnic Institute, Department of Biological Sciences,
Department of Computer Science, Troy, NY 12180, USA

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
