

Special Issue

Sensors for Food Safety and Quality

Message from the Guest Editor

This Special Issue is dedicated to publishing articles that describe the novel sensors or high-throughput screening technologies that are involved in detecting multiple pathogens, spoilage microorganisms, microbial communities, indicator microorganisms, microbial or non-microbial toxins, and non-microbial parameters (water activity, pH, metabolic by-products) relevant to improving the safety, quality, and security of foods.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
