

## Special Issue

# Remote Sensor Based Geoscience Applications

### Message from the Guest Editors

The main objective of this Special Issue is to collect papers (both original research articles and review papers) to give insights on new geosciences applications of remote sensors and to understand the state-of-the-art of the very broad spectrum of applications and sensors used for the Geosciences. This Special Issue would like to represent a complete and up-to-date perspective of how the development of new sensors, new networks, and the integration of heterogeneous measurement systems and new processing technologies may contribute to improve knowledge and open up new horizons and challenges facing geoscientists.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

---

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
