# **Special Issue**

# Graphene-Based Strain and Pressure Sensors

### Message from the Guest Editors

In the last few years, the rapid progress of nanotechnology and nanoscience has undeniably favored the development of new materials for highperformance strain and pressure sensors which are attracting tremendous attention and investments due to the capabilities they are expected to enable in different fields of application. In particular, graphene, on account of its outstanding physical properties, has been used in different forms to develop novel highly sensitive, flexible, multifunctional, cost-effective strain/pressure sensors potentially exploitable for the health monitoring of complex structures, for physiological-biomechanical monitoring through wearable devices, and for the emerging electronic-skin and soft robotic technologies. This Special Issue aims to publish original research papers with a special focus on fabrication, characterization, modeling, and simulation of novel strain/pressure sensors in which graphene plays a fundamental role as sensing material, enables new functionalities, and/or contributes to enhance the sensor response.

Guest Editors Prof. Dr. Alessio Tamburrano

Dr. Hossein Cheraghi Bidsorkhi

Dr. Marco Fortunato

**Deadline for manuscript submissions** 1 December 2025

# About the Journal

# Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

### Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

## Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
