

## Special Issue

# New Trends in Intelligent Social-Health Systems Empowered by Internet of Every Things

### Message from the Guest Editors

The population pyramid is changing at an increasingly rapid pace, and the new structure involves unavoidable changes in public services and their financing, with particular reference to the world of health and social services. There is a real need to incorporate artificial intelligence into their processes over the next few years with intelligent systems that learn from existing applications in order to process and manipulate data and communicate with other expert systems. In this context, the Internet of Everything and devices with sensors play a key role in providing comfort, greater productivity, and cost reduction for individuals and companies. This Special Issue is addressed to all intelligent social health systems designed with sensors following the Internet-of-Everything paradigm.

- intelligent systems
- Internet of Everything
- artificial intelligence
- soft computing
- social health systems
- accessibility
- dependency
- disability
- aging
- accessibility

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
