

Special Issue

Human–Machine Interfaces: Design, Sensing and Stimulation

Message from the Guest Editors

The Special Issue covers fundamental technology used in electronic, mechanical, and electrical engineering, including the synthesis and integration of Human–Machine Interfaces, the design of electronic devices, sensing technologies, the evaluation of various performance characteristics, and the exploration of their broad applications in industry, modeling and simulation, simulation analyses, and so forth. We invite investigators to contribute original research articles and review articles that will stimulate the continuing efforts to develop electronic and mechanical devices and sensors for Human–Machine Interfaces. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
