

Special Issue

Hyperspectral Imaging Sensing and Analysis

Message from the Guest Editor

The main goal of this Special Issue is to provide a specialized platform for researchers dedicated to this field where they can share their important discoveries, theoretical and experimental advances, technical breakthroughs, methodological innovations, application developments, viewpoints, and perspectives to the community of Hyperspectral Imaging Sensing and Analysis. In this Research Topic, authors are welcomed to contribute submissions in the themes including, but not limited to:

- Computational hyperspectral imaging and reconstruction methods.
- Miniature or mobile hyperspectral imaging system.
- Airborne hyperspectral imaging system.
- Hyperspectral imaging using unmanned aerial vehicle platform.
- Calibration methods for kinds of hyperspectral imaging system.
- Application processing of hyperspectral imaging.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
