

Special Issue

Infra-Operative Imaging, Sensing and Augmented Reality in Image-Guided Surgery

Message from the Guest Editors

Image-guided surgery (IGS) has gained widespread acceptance in various clinical practices. Although the core concepts of IGS have not changed, advances in image guidance technology, including the incorporation of intra-operative imaging, sensing and augmented reality, have the potential to enhance the safety of surgery, improve the accuracy of interventions, and aid in more complete surgery, with improved outcomes. In the past few years, significant progresses have been achieved in developing novel intra-operative imaging means, in incorporating smart sensing technology and in the introduction of new augmented reality display. This Special Issue is open to research and review papers in this field, including, but not limited to: • Intra-operative imaging

- Robotic imaging
- Surgical imaging and vision
- Intra-operative sensing, perception and recognition
- Augmented reality in IGS
- Multi-modal image fusion and visualization

Guest Editors

Prof. Dr. Guoyan Zheng

Prof. Dr. Wenyong Liu

Prof. Dr. Xiaojun Chen

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
