

Topical Collection

Sensors, Image, and Signal Processing for Biomedical Applications

Message from the Collection Editor

Recording information from the human body by measuring signals and taking images is important throughout the entire clinical process covering anamnesis, diagnosis, therapy, and treatment. In addition to proper recording, preprocessing and pre-analyzing signals and information from the patient fusion of quantitative data and qualitative information also play an important role. The field of biomedical imaging and signal processing has been and still is open to new developments in other disciplines and fields such as physics and chemistry, independent of how remote these may first appear—this is highlighted in the example of Kinect and another kind of devices originally developed for gaming rather than imaging. This issue puts the focus on recent developments in the fields of biomedical, medical, and clinical image and signal processing. These include new sensing methods, approaches to analyzing the recorded images and signals, data fusion methods, and algorithms to obtain new and additional insights.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
