

## Special Issue

# Inertial Sensors for Gait Recognition and Analysis

### Message from the Guest Editors

Inertial sensors have been used over the years for multiple purposes (among them, gait and movement analysis). The amount of data available from devices based on inertial systems has grown exponentially, leading to the possibility of new developments and services based on specific aspects of human mobility. Wearable inertial systems can provide relevant information in different scenarios and applications (health, wellbeing, sport, home activity, etc.). Specifically, gait analysis is a topic that, due to the complexity of the movement itself, offers to clinicians valuable information for the study of multiple pathologies. Continuous gait analysis will allow the continuous monitoring of highly relevant aspects of people's health status or even continuous monitoring of rehabilitation processes. In this framework, we are pleased to edit this Special Issue on "Inertial Sensors for Gait Recognition and Analysis", which deals with analysis procedures applied to inertial sensors' data, covering from improvements in the devices' hardware to the embedded algorithmic set.

### Guest Editors

Prof. Dr. Joan Cabestany

ISSET Research Group (Integrated Smart Sensors and Health Technologies), Department of Electronic Engineering, Universitat Politècnica de Catalunya, 08034 Barcelona, Spain

Dr. Carlos Pérez-López

Consorci Sanitari de l'Alt Penedès i Garraf (CSAPG), 08810 Sant Pere de Ribes, Spain

### Deadline for manuscript submissions

closed (31 May 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
