

## Special Issue

# Intelligent Wearable Systems and Computational Techniques

### Message from the Guest Editors

Wearable systems have attracted attention in many fields, such as healthcare, sport, and security. Their development requires tight collaborations of different sectors (material science, fashion and functional garment design, electronics, advanced manufacturing, data analysis and medicine, etc.) and involvement of efficient computational tools in order to increase the intelligence capacity of these devices. In this context, we are organizing a Special Issue in *Sensors* to offer a systematic overview of this emerging research field and provide innovative interdisciplinary approaches. This issue will provide a leading forum for disseminating the latest results of research, development, and applications of wearable systems with a strong involvement of artificial intelligence.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
