Ground and Space-Borne Multi-Instrumental Radio-Wave-Based Research of Ionospheric Irregularities and Structures

Message from the Guest Editor

In recent years, we have observed an increasing interest in ionospheric research coming from different parts of the scientific community. Not only are there the people interested in the traditional sense of this branch of science using increasingly more diverse instrumentation, but also radio astronomers are seeking insight into the ionosphere as it directly impacts their observations. We also can observe a shift from scientific interest in TEC depiction of the ionosphere state at a given time towards detailed descriptors of the dynamics of the ionosphere changes over time, especially short periods.

Guest Editor

Prof. Dr. Andrzej Krankowski

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
