

Special Issue

Localising Sensors through Wireless Communication

Message from the Guest Editors

The localisation of mobile devices often uses their wireless communication channels to estimate or aid the estimation of their location. Well-known examples include triangulation in cellular networks, fingerprinting in Wi-Fi networks, or proximity detection with Bluetooth radios. These concepts are still of interest, as they allow the finetuning of location estimation through advanced methods in artificial intelligence, Bayesian filtering, and multimodality. More recently, novel technologies have become widely available: ultrawideband, low-power wide area networks, and vehicular communication. These are now being investigated with proven approaches, and with smart approaches that incorporate the unique features of those novel technologies. This Special Issue aims to report high-quality research in recent advances in localising sensors through wireless communication. For more information, please click: mdpi.com/si/79694.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
