

Special Issue

Flexible Sensitive Magnetic/Electronic Materials and Sensors

Message from the Guest Editors

Flexible electronics make a significant contribution to the realization of human-machine interaction, health monitoring, robotics, wearable electronics, medicine, and artificial intelligence. Over the past few decades, a lot of flexible or stretchable sensors have been developed, which enhance human perception by transducing various variables, such as temperature, pressure, magnetic field, and other physiological parameters, into electronic signals. We invite manuscripts (both reviews and original research articles) to this upcoming Special Issue in all aspects related to sensitive magnetic/electronic materials, flexible or stretchable magnetic sensors, flexible or stretchable tactile sensors, smart sensing systems, and wearable devices and electronics. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
