

## Special Issue

# Microbial Sensors and Biosensors

### Message from the Guest Editor

This issue is devoted to the field *Microbial Biosensors* ranging from detecting growth of microorganisms to the tracking of metabolic activity or drug resistance within microorganism based on nano/microtechnology. Contributions on the integration of the microbial biosensors in small form factor e.g. lab-on-chips are of high interest for this special issue. All types of applications using nano/microtechnology for on-line detection will be accepted. Prof. Dr. Martin Hegner

---

### Guest Editor

Prof. Dr. Martin Hegner

School of Physics, Centre for Research on Adaptive Nanostructures and Nanodevices, Trinity College Dublin, Dublin 2, Ireland

---

### Deadline for manuscript submissions

closed (30 November 2009)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
