

Special Issue

Microfluidic Sensors 2018

Message from the Guest Editors

The integration between sensors and microfluidics is a rapidly developing research area with application implications in health, environmental monitoring, food, and chemical and biological analysis. This Special Issue aims to cover advancements, developments and applications over a wide range of topics in this area. We solicit research papers as well as state-of-the-art contributions and critical reviews. This Special Issue aims at providing an overview of a wide class of sensors integrated with microfluidics (optical, acoustic, electrical, electrochemical, mechanical, etc.) and their use to generate complex and operative microsystems for several applications (biomedical, chemistry, environmental, etc.)

Dr. Gianluca Persoichetti

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
