Millimeter-Wave Antenna Array: Design and Challenges

Message from the Guest Editors

As the transition to fifth generation (5G) communication officially begins, the increasing demand for high-speed wireless solutions for both industries and consumers is prompting more intensive research for mmWave technologies than ever. Although many different building blocks towards a successful adoption of mmWave technology, such as communication networks, channel analysis, and transmitter and receiver designs, can be considered, the challenges in the mmWave antenna must be primarily concerned. As the massive number of antenna elements for beamforming and wave propagation behavior in mmWave are unprecedented challenges, array antennas and array field/wave propagation aspects at mmWave must be thoroughly studied. To support the new frequency bands and wireless system architectures that bridge between traditional antenna topics and the challenges confronted with mmWave, the authors are invited to submit articles reporting recent advances in mmWave antenna array technologies. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
