Sensors for Mobile Healthcare Monitoring System

Message from the Guest Editors

Mobile healthcare monitoring systems are one of the most promising R&D areas because intelligent sensors and signal processing techniques can record and provide information by monitoring our body. This Special Issue aims to create a sharing opportunity between experts on healthcare sensors and signal processing practitioners that apply such technology within the healthcare monitoring system field.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
