

Special Issue

Sensor Networks in Distributed Measurement Systems

Message from the Guest Editors

This Special Issue aims to present both review and original research articles related to “Sensor Networks in Distributed Measurement Systems”. The Special Issue is open to contributions ranging from the proposal of new sensors for novel applications; sensor networks for distributed measurement applications; the characterization of sensor networks for industrial, IoT, medical, and other applications; and the synchronization and localization of sensors in distributed applications.

- sensors
- sensors networks
- distributed measurements
- sensor network performance characterization
- application of sensor networks

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
