

Special Issue

Optical Sensors for the Measurement of Human Posture and Movement

Message from the Guest Editor

Recent developments have led to widespread research in the field of optical sensors for measurement of human posture and movement. Such sensors use visible (VIS), near-infrared (NIR) light, or multimodal approaches in a variety of applications to support many medical use cases (posture, surgery, prescreening, etc.), biometrics, computer modeling, and graphics. Unresolved challenges are connected with making highly accurate and fast measurements, the development of multiview approaches, calibration of complex systems, and the maturity of optical sensors in practical conditions, to name a few. The goal of this Special Issue is to invite high-quality, state-of-the-art research papers that deal with challenging issues in optical sensors for measurement of human posture and movement. Topics of interest include, but are not limited to, the following:

- Development of new sensors for measurement of human posture and/or movement;
- Development of methods and algorithms for human posture assessment and/or monitoring;
- Applications of optical sensors for human posture estimation in various applications.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
