Optical Communication Sensor Network

Message from the Guest Editor

Optical communication has become one of the most important communication technologies today owing to its outstanding advantages, such as high transmission speed, large information capacity, and long transmission distance. At present, more than 90% of global information communication services are carried out by optical networks, involving various fields of the national economy. With the substantial increase in the transmission rate and capacity of optical networks, the sources of security threats and attack methods are continuously emerging, and network security has recently gained attention as an important strategic issue.

Guest Editor

Prof. Dr. Ning Jiang

School of Information and Communication Engineering, University of Electronic Science and Technology of China, Chengdu 611731, China

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
