

Special Issue

Novel Detectors for Particle Identification and Tracking

Message from the Guest Editors

Nowadays particle detectors are employed in a variety of fields, and their application area is still spreading. It spans from fundamental research in particle physics to medical imaging, radiation monitoring, industrial applications, etc.

The Special Issue is dedicated to presenting the most recent advances in the field of particle detection, introducing innovative technologies for charged particle identification and tracking.

Contributions describing new prototypes that exhibit remarkable improvements with respect to actual detectors or interesting concepts for developments of novel detectors are especially welcome.

Survey papers and reviews are also welcomed.

Guest Editors

Dr. Paolo Brogi

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
