

Special Issue

Piezoelectric Transducers

Message from the Guest Editor

This specific volume of piezoelectric transducers aims to combine the advances of this technology from three points of view: the behavior of piezoelectric materials for transducers; the design and characterization of both the parts and the complete transducer; and the main applications of these piezoelectric transducers. Therefore, research articles, both basic and applied, theoretical and experimental, on any of these points of view are welcome. The present Special Issue in *Sensors* can be a reference and joining point for all researchers working in the field of piezoelectric transducers. Topics are included but not limited to: Piezoelectric theory: analytical and numerical solutions; Transducer design and characterization; Applications of piezoelectric transducers.

Guest Editor

Dr. Ivan Felis Enguix

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
