

## Special Issue

# Recent Advances in Imaging and Sensing 2022

### Message from the Guest Editors

We are pleased to announce that the *Sensors* Section Sensing and Imaging is now compiling a collection of papers submitted by the Editorial Board Members (EBMs) of our section and outstanding scholars in this research field. We welcome contributions as well as recommendations from the EBMs. We expect original papers and review articles showing state-of-the-art theoretical, and applicative advances, new experimental discoveries, and novel technological improvements regarding sensing and imaging. We expect these papers to be widely read and highly influential within the field. All papers in this Special Issue will be well promoted. We would also like to take this opportunity to call on more excellent scholars to join the Section Sensing and Imaging so that we can work together to further develop this exciting field of research.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
