

Special Issue

Remote Sensing for Geophysical Fluids

Message from the Guest Editor

The purpose of this Special Issue is to publish the latest developments in remote sensing and in models for geophysical fluids. We wish to emphasize the link between data and models: what is the best way to incorporate data in models? Studies of the impact of errors and error propagation from observation to the solution of numerical models will be encouraged, as well as data assimilation and sensitivity studies.

Guest Editor

Prof. Dr. François Xavier Le Dimet

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
