

Special Issue

Sensors for Coastal Habitat Mapping under the Sea and Applications

Message from the Guest Editors

Coastal habitats providing various ecosystem services for human society are indispensable for its sustainable development and the earth system, but are impacted by human pressures. For analyzing methods, it is needed to share case studies on coastal habitat mapping that use easy and efficient analyzing methods with a high accuracy for practical use, including supervised and unsupervised classifications with traditional algorithms and recent ones such as machine learning, artificial intelligence, etc. This Special Issue focuses on the above-mentioned topics. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
