

## Special Issue

# Sensors for Coastal Habitat Mapping under the Sea and Applications

### Message from the Guest Editors

Coastal habitats providing various ecosystem services for human society are indispensable for its sustainable development and the earth system, but are impacted by human pressures. For analyzing methods, it is needed to share case studies on coastal habitat mapping that use easy and efficient analyzing methods with a high accuracy for practical use, including supervised and unsupervised classifications with traditional algorithms and recent ones such as machine learning, artificial intelligence, etc. This Special Issue focuses on the above-mentioned topics. ### Guest Editors

Prof. Dr. Teruhisa Komatsu

Atmosphere and Ocean Research Institute, The University of Tokyo, 5-1-5, Kashiwanoha, Kashiwa 277-8564, Japan

Dr. Kenichi Hayashizaki

School of Marine Biosciences, Kitasato University, Kanagawa 252-0373, Japan

---

### Deadline for manuscript submissions

closed (25 August 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
