# **Special Issue**

# Sensors for Multiple Object Tracking

### Message from the Guest Editor

This Special Issue focuses on the sensing issues involved in multiple object tracking applications, such as limited field-of-view, occlusion, extended measurements, as well as scheduling or controlling sensors in multiple object tracking applications.

- New sensing technologies for multiobject tracking
- Sensor scheduling in multiobject systems
- Sensor control in multiobject systems
- Extended target tracking
- Multisensor fusion in multiobject systems
- High-clutter tolerant multiobject tracking
- Tracking with limited field of view
- Tracking of intermittent targets

# About the Journal

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
