

Special Issue

Sensor Application in Bioelectrocatalysis and Bioelectronics

Message from the Guest Editor

In recent years, much interest has been devoted to the exploitation of biological materials and designs for the implementation of advanced electronic devices, leading to a substantial research and development of novel bioelectronic devices applied to a wide variety of analytical problems and energy conversion purposes. This Special Issue is dedicated to highlighting the latest advances in the implementation of sensors in bioelectrocatalysis and bioelectronics, including self-powered bioelectrochemical devices, as well as the development of new related biosensing platforms for energy storage and conversion applications. Both review articles and original research articles are welcome. For more information, please visit: mdpi.com/si/44329.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
