Sensing for Healthy Ageing and Wellbeing

Message from the Guest Editors

Healthy ageing should be an aim in modern society. Following the increase in life expectancy due to improvements in medicine and technology, the prevalence of age-related disorders is increasing. Further, such conditions are appearing earlier in life, even in adolescence, introducing disturbances into gait, posture, and general daily activities. These disorders can appear in individuals with a previously diagnosed musculoskeletal lesion as well as in able-bodied persons. Thus, there is a disparity between increases in life expectancy and wellbeing.

Guest Editors

Dr. Simone Tassani

BCN-MedTech, Universitat Pompeu Fabra, 08002 Barcelona, Spain

Prof. Dr. Juan Ramírez

Departamento De Ingeniería Mecánica, Universidad Nacional de Colombia, Medellín 050000, Colombia

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
