

Special Issue

Sensing Human Movement in Health and Disease

Message from the Guest Editor

In this Special Issue of *Sensors*, we will report on the application of wearable sensors and how they are used to track, manage and mitigate health problems for people in the 21st century. We invite authors to submit reviews, case studies and novel research articles that explore particular wearable sensors for healthy aging and the management of chronic diseases. **Keyword**

- wearables
- wearable sensors
- diabetes
- Parkinson's disease
- multiple sclerosis
- COPD
- asthma
- healthy aging
- arthritis

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
