

## Topical Collection

# Sensors in Agriculture and Forestry

### Message from the Collection Editor

A list of sensors covering the above topics, but are not limited, is the following: biological (including chemical and gas analyzers), water sensors, meteorological sensors, weed seekers, optical cameras, Light Detection and Ranging (LIDAR), photometric sensors, soil respiration or moisture, photosynthesis sensors, Leaf Area index (LAI) sensors, range finders, Dendrometers, hygrometers. This Topical Collection covers the following topics related to the above sensors:

- Sensors devices capabilities, materials and technologies
- Applications and problems addressed
- Sensors domain-oriented devices and methods used for processing the data sensed

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
