Sensors for Biomedical Signal Acquisition and Processing

Message from the Guest Editor

Biomedical signal processing has many successful applications in industry and medicine; it is growing rapidly with the aid of novel sensors, signal processing, and artificial intelligence algorithms. It is also showing growth in the field of medical treatment, especially in applications related to aging. In this Special Issue titled “Sensors for Biomedical Signal Acquisition and Processing”, we expect contributions from a broad community of scientists and researchers working on diverse signal acquisition and signal processing applications in medicine and biology. Novel sensors, signal acquisition, and artificial intelligence techniques that contribute to biomedical signals are welcome.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
