

Special Issue

Sensors for Posture and Human Motion Recognition

Message from the Guest Editors

This Special Issue will cover a wide range of topics around human posture and motion, including new sensor technologies to capture posture and motion; new algorithmic approaches to derive, analyze, and recognize posture and motion from sensor data; and all combinations of these techniques. Keywords:

- wearable devices
- inertial sensors
- hybrid systems
- sensor data fusion
- hybrid modeling approaches
- temporal segmentation of motions
- action classifications from sensor data

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief
