

Special Issue

Smart Sensors for the Improvement of Sustainable Transport Modes and Road Safety

Message from the Guest Editors

Due to a generalized doubling in road travels in each country with an even greater increase in costs of congestion and road accidents related social costs, an essential and challenging task for transportation researchers and planners is ensuring the promotion of sustainable transport modes and safety to road networks. To address these important objectives an interdisciplinary approach is needed, especially considering the recent rapid developments and advancements in transportation technologies and smart sensors. The motivation behind the special issue is provide concepts, approaches, techniques, and deployment strategies on the improvement of Road Safety through the employment of ITS technologies and Internet of things (IoT) based solutions. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
