

## Topical Collection

# Survey on Research of Sensors and Robot Control

### Message from the Collection Editors

Today, robots not only work in structured, well-known environments to perform repetitive tasks precisely and accurately. The digital transformation of industry allows the continuous adjustment and reaction to unforeseen disturbing events of production systems through digital twin and similar technologies, and requires the intelligent sensorization of robots and resources for remote monitoring. Besides, robots are increasingly playing a role in our daily life and in civil society. In new industrial and service applications, robots have to become familiar with and interact with the environments. These applications require the heavy use of exteroceptive sensors and perceptive skills to recognize the environment and guide interaction activities, safeguarding the sustainability of the environment and human health. The aim of this Special Issue is to collect experimental and theoretical papers covering different aspects and modalities of sensing applications in the wide industrial and service robotics domain. For detailed information, please visit [here](#).

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
