

## Special Issue

# Simultaneous Localization and Mapping (SLAM) for Mobile Robot Navigation

### Message from the Guest Editors

Recent years has seen a surge of mobile robot technologies entering our daily lives. This trend accelerated during the COVID-19 pandemic amplifying the need for automated mobile solutions, e.g. for delivery, surveillance, inspection, or mapping applications. However, for mobile robots to be deployed in a meaningful fashion, they need to be able to navigate safely in dynamic, possibly even unknown, environments and interact naturally with humans. Simultaneous Localization and Mapping (SLAM) is seen as one of the key enablers for the successful deployment of mobile robots. Despite the popularity of SLAM, it remains a challenging task for SLAM algorithms to work robustly in dynamic, poorly lit, featureless or unknown environments. In fully autonomous operation, data from computer vision, inertial, LiDAR and other time-of-flight sensors are typically coupled with the latest Artificial Intelligence (AI) and Machine Learning techniques such as Gaussian Process Regression and Graph Signal Processing for SLAM algorithms to overcome these technical hurdles.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro  
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
