## Smart Cities

### Message from the Guest Editor

Throughout history, cities have been at the heart of societies around the world. With their dense populations, in cities, both societal and technical challenges are typically experienced at a larger scale, with a greater impact. With the accelerating uptake of Internet of Things technologies, the IoT is now coming to cities around the world. Smart cities are arising as a new paradigm for modern cities. In a smart city, Internet of Things technology supports the city government, the (local) economy, and helps citizens to live a better life in the city of tomorrow. To realize this highly-ambitious goal, in smart cities, Internet of Things application domains, such as smart mobility, smart sustainability, and smart grid, all have to be intelligently combined to create synergies, taking into account the needs of citizens, municipalities, and economies. ## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
