

Special Issue

Sensor Systems in Smart Environments

Message from the Guest Editors

A “smart” environment incorporates intelligent systems (e.g., smart home, smart factory, smart city, smart building, smart parking, smart agriculture, intelligent traffic systems, smart car etc.) employing pervasive computing, machine learning, artificial intelligence, cognitive sensor systems, wireless and sensor networking to realize cyber and physical components for sensing, reasoning and controlling the environment. The development of a smart environment introduces several challenges, which include system integration, system maintenance, geographical and functional extensibility, social networking, mobile computing, context-aware applications and services, human-in-the-loop modeling and simulation, big data analysis, cloud and edge-based IoT frameworks and environment, field experiments and testbeds. The main goal of this Special Issue is to present and discuss recent advances in the area of sensor systems, in particular in regard to technologies, architectures, algorithms and protocols for smart environments with emphasis on real smart environment applications.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
