

Special Issue

Sensors for Smart Grids

Message from the Guest Editor

Advances in sensing devices, digital technologies, and communications together make it possible to achieve accurate, online, real-time monitoring of the grid and intelligent, automated control of its operation. To this end, the sensors play a crucial role in the smart grid. Sensors deployed throughout the whole network to the grid edge enable capturing detailed information about the state of the grid, which includes not only time-synchronized electrical parameters but also many other physical parameters that are relevant to the health of the grid components for proper functioning. In this context, we are looking for contributions to the Special Issue “Sensors for Smart Grids” on novel developments in the science and technology of sensors and sensing systems. The scope also extends to associated aspects, such as signal processing, algorithms, and data analytics that enhance the sensor’s performance.

Guest Editor

Dr. Toan Phung

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
