

Special Issue

Smart Sensing for Pervasive Health

Message from the Guest Editors

Recent advances on sensor technologies and their pervasiveness allow the development of numerous applications and services to improve people's health. This Special Issue invites papers presenting novel research on utilizing sensors placed on users' bodies and in their environments to understand and improve their health and wellbeing. We are interested in sensing devices, methods, and applications for obtaining and analyzing different categories of data (physiological, behavioral, emotional, environmental, etc.), and utilizing different technologies such as signal processing, machine learning, etc. for empowering citizens and health professionals to take action based on the analyzed sensor data. This Special Issue is supported by the WideHealth Project, which is a European TWINNING project (No. 952279) that supports dissemination activities on the topics of eHealth and Pervasive health, and aims to enable a new generation of researchers on the aforementioned topics.

Guest Editors

Dr. Hristijan Gjoreski

Dr. Oscar Mayora

Dr. Mitja Luštrek

Dr. Tiago Guerreiro

Prof. Dr. Bert Arnrich

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
