

## Special Issue

# Smart Sensors for Damage Detection

### Message from the Guest Editor

This Special Issue is aimed at the submission of both review and original research articles related to smart sensors in the framework of a structural health monitoring (SHM) system. This includes sensor technologies that automatically detect damage based on its direct sensing principle. On the other hand, a smart sensor or smart sensor array may consist of one or multiple identical sensors providing indirect information about damage by suitable signal processing techniques. The Special Issue “Smart Sensors for Damage Detection” welcomes contributions in this field including, for example, acoustic transducers, electromagnetic sensors, and optical sensors. It is expected that the sensor and its underlying sensing principle has been properly described and its damage detection performance has been tested in a relevant environment. Numerical investigations may also help to provide additional insights. In any case, it is required to show experimental results from a dedicated laboratory experiment possibly combined with a demonstration in the field. Potential applications include aviation and maritime industry, but also pipeworks, bridges, and other technical structures.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
