

Special Issue

Smart Textiles Sensors

Message from the Guest Editors

This Special Issue aims to gather novel developments in the creation and use of smart textile sensors, that is, sensors based on textile materials or which are seamlessly integrated with textile materials. We would like to give special attention to printing, screen printing, coating, and laminating techniques on fiber-based materials, as well innovative garment–fabric–yarn construction methods to achieve a sensing functionality.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
