Special Issue

Smart Cloud Computing Technologies and Applications

Message from the Guest Editors

Smart cloud computing technology has developed rapidly recently with the acceleration of Internet-of-things (IoT) technology and artificial intelligence (AI) technology. We have entered an era in which cloud-based systems are given "smart" properties that can meet substantial demand in multiple fields, from tele-health to e-learning, and from vehicular systems to mobile applications. In this Special Issue, we aim to collect recent academic achievements in novel techniques of the most advanced smart cloud computing aligned with other novel technologies, such as IoT, AI, and big data technologies. Dr. Meikang Qiu

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:
JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
