

Special Issue

Multipixels Single Photon Detectors for Quantum Applications

Message from the Guest Editors

Non-classical states of light, as for instance entangled photons, promise dramatic improvements over classical optical methods, or even allow for novel measurement schemes. Recording efficiently their spatio-temporal properties requires sensors that combine high temporal and spatial resolution and high sensitivity. This special issue is addressed to all arrays of single photon detectors for quantum sensing and their applications.

Guest Editors

Dr. André Stefanov

Institute of Applied Physics, University of Bern, Hochschulstrasse, 63012 Bern, Switzerland

Dr. Leonardo Gasparini

Fondazione Bruno Kessler, Center for Sensors & Devices, Integrated Readout ASICs & Image Sensors, Via Sommarive 18-Povo, 38123 Trento, Italy

Deadline for manuscript submissions

closed (30 June 2021)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
