Advanced Systems for Human Machine Interactions

Message from the Guest Editor

Machines have been an important part of human life since the first industrial revolution. Recently, however, they have become a part of our lives in way that could hardly be imagined even a couple of decades ago. Concepts such as the Internet of Things, Artificial Intelligence, Machine Vision, 5G networks, etc. are pointing toward a future where machines and humans will become even more connected. A very important part of this process are human-machine interface (HMI) systems. As they are the part the human most often comes in contact with when dealing with machines, their design is very important and can often make the difference between certain applications being accepted among users or not.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
