

# Special Issue

## Wearable Electronic Sensors

### Message from the Guest Editor

Wearable electronics, where electronic components or systems are integrated into wearable objects or directly used on the body, has been intensively explored for the last few decades. In particular, wearable sensors is one of the main parts of wearable electronics based on a variety of applications such as healthcare, activity tracking, sport, virtual reality, and environmental monitoring. The present Special Issue reports recent advances in the multidisciplinary research of wearable sensors, including textile-based sensors, electronic skin, fiber electronic sensors, and various forms of wearable sensors. We look forward to and welcome your participation in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
