Wireless Communication in Internet of Things

Message from the Guest Editors

The Internet of Things (IoT) allows billions of smart devices to be connected to the Internet. Such smart devices are sensors and actuators that have processing, memory, storage, and communication capabilities. Wireless communication plays a major role in IoT systems, since deploying several sensors through wired connection is tedious, and for some applications it is impossible to establish wired communication. Due to the advances in radio technologies and wireless communication protocols, it is possible to employ wireless links for data communication in IoT systems. This Special Issue focuses on various topics related to wireless communication, and some are listed in the keywords.

Guest Editors

Dr. Hossein Fotouhi

Dr. Maryam Vahabi

Prof. Dr. Reza Malekian

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
