

## Special Issue

# Wearable Sensors and IoT-Oriented Systems for Life Quality Improvement

### Message from the Guest Editor

Advances in digital technologies are allowing people and things to constantly stay connected and synchronized with the Internet, introducing us to a world always connected and full of possibilities, thanks to the detection, processing, and sharing of the data collected by the devices. Particularly, the availability of microcontroller-based data-processing electronic boards, smart sensors, and wireless communication modules, all featured by ultra-low power consumption and high performances, offers new application solutions in the wearable devices field, which enable real-time and punctual monitoring of user's biophysical parameters. This Special Issue "Wearable Sensors and IoT-Oriented Systems for Life Quality Improvement" brings together innovative developments and synergies related. ## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

---

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro  
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
